Office Action Summary

### DETAILED ACTION

This Office action is in response to the amendment filed October 7, 2002 in which claims 2, 4, 9, 10, 15 and 16 were canceled and claims 1, 8 and 14 were amended.

The rejection of the claims as being anticipated by Hidetsugu in withdrawn view of the amendment to the claims.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 5-8, 11-14 and 17-19 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 9743210.

WO teaches an oxygen-generating composition comprising 0.1-15% of copper oxide and/or nickel oxide as a catalyst; an alkali metal chlorate or perchlorate oxygen generating source, 0.1 to about 5% strontium peroxide as a chlorine suppressant and rate reaction modifier, 0.5-15% of a metal powder, such as iron, tin, etc. as the fuel and up to 5% of a binder (glass power, glass fiber) (see abstract; page 4, lines 25-31; page 5, lines 3-30; page 6, lines 14-25; page 7, lines 3-9; Examples). In the examples, WO also teaches that the oxygen generating composition may contain catalytic amounts of cobalt oxide (see example 1, 5<sup>th</sup> layer; Example 2, 3<sup>rd</sup> layer).

Art Unit: 1714

Accordingly, WO teaching all the material limitations of the claims, anticipates the claims.

Applicant argues that WO does not teach or suggest the use of cobalt oxide as a catalyst.

While WO does not specifically state that cobalt oxide is present in the composition as a catalyst, the examples clearly teach that cobalt oxide is present in the composition in catalytic amounts. See Example 1, layer 5 and Example 2, layer 3).

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
